

## **Spotlight on Mike Kleindl**

### **What is your area of responsibility at RRF?**

I'm one of the Application Engineers here at RRF. We are tasked in helping manufacturers succeed through the application of high tech factory automation solutions. This entails helping to find and develop solutions for all kinds of customer applications, anything from vision systems to robots and most everything in between.

### **Tell us a little about your background?**

I have a background in electrical engineering, welding, mills, lathes, grinders, VFD's, control panels, PLC, HMI, cameras, CAD drawings, etc. Basically anything related to Industrial Automation.

### **What brought you to RRF?**

I was at my previous employer for 14 years. I know that it's very important to continue to grow and learn. When I heard of an opportunity at RR Floody, I knew this would be a good step for me. Now I'm part of a team that helps implement all the new and exciting technologies.

### **What strengths do you bring to this job that makes you a valuable resource to your customers?**

I would say my biggest strength is tenacity, not giving up on problems. I may not always have the answer, but I will put the time in to figure it out.

### **What are some key lessons you have taken from your career thus far?**

Do unto others as you would have them do unto you!

**Describe some of your hobbies – what do you like to do outside of work?**

Spend time with my wife Kelli, son Zach, daughter-in-law Bree, three daughters Megan, Zoey and Ava and grandsons Elijah and Luke. Also, leading Bible studies at church, riding four-wheelers with my family, hiking and even sometimes fishing.
