Joe T. Coffey

Quality Manager/Sorting Manager

I am writing this letter to recommend the services, and expertise of RR Floody. They have an amazing staff to work with who take the time to listen to the needs of their customers. We have had multiple upgrades done on PACE machinery. All with multiple camera systems installed. The machines have been very dependable to say the least. The user functionality on the machine is the easiest that we have when it comes to setting up sorting jobs. Basically, a drag and drop window sequence to set up the inspection areas necessary for the part being sorted. I would highly recommend RR Floody for any of your upgrade needs on any vision project that you might have. We will continue to use RR Floody for all of our current and future turnkey projects.

If you have any further questions, please feel free to contact me.

Regards,
