Quickly and seamlessly add robotic palletizing to your process with an impressive ROI.

## MPS Modular Palletizing System

The MPS system is a turn-key palletizing solution that provides end-users the features needed to quickly setup a robot for palletizing cases or other standardized products for final shipment.

MPS Features Include...

- Collaborative Universal Robot
- Touchscreen Interface
- Two Pallet Build Station
- Case Weight Capacity Approximately 17lbs (depending on tooling)
- Cycle Rate of 5-7 per minute
- Multiple Pallet Patterns
- Multiple End of Arm Tooling Configurations
- Visual and Audible Alarms
- Small Footprint 24" x 50" (for portable unit)

Available Add-On Components...

- Infeed Conveyor
- Slip Sheet Feeder
- Area Sensors
- Light Curtains
- Full Machine Guarding
- Upstream Case Code Printing
- Barcode Verification
- Pallet License Plate Label Print and Scan
